Project acronym: IMAILE

Project title: Innovative Methods for Award procedures within ICT Learning in Europe

Grant Agreement number: 619231

Coordinator: Halmstad Project manager Ellinor Wallin

Project co-funded by the European Commission,

Seventh Framework Programme

Funding Scheme: FP7 – CP –CSA CALL 8.2.A

To all potential interested tenderers, we hereby inform of the following amendments to the Invitation to Tender and Its Annexes:

A - On page 35 of the Invitation to Tender, where it is read "VI. How well the tender demonstrates the potential to contribute to the achievement of the societal challenges presented (More STEM professionals in 2015 and less costs with early school leavers) (scale – 0 -3 – 6 – 9)"

should be read VI. How well the tender demonstrates the potential to contribute to the achievement of the societal challenges presented (More STEM professionals in 2030 and less costs with early school leavers) (scale – 0 -3 – 6 – 9)"

B - On page 8 of Annex 2 to the Invitation to Tender – Tender Form Template, where it is read "Please describe with more details how the proposed concept solution and technology can contribute to the achievement of major societal challenges such as an expected increase in the number of STEM professionals by 2030 and the reduction of member states costs with early school leavers. Maximum 1 A4 pages."

should be read "Please describe with more details how the proposed concept solution and technology can contribute to the achievement of major societal challenges such as an expected increase in the number of STEM professionals by 2025 and the reduction of member states costs with early school leavers. Maximum 1 A4 pages."

Co-funded
by the European Union

C -On page 5 of the Annex 3 to the Invitation to Tender – Guidance in Using the Tender Form, where it is read “VI. Potential of the proposed concept solution and technology to achieve major societal challenges - Avoiding the use of unnecessary technical jargon, describe clearly how the proposed concept solution and technology can contribute to the achievement of major societal challenges such as an expected increase in the number of STEM professionals by 2030 and the reduction of the member states costs with early school leavers. Maximum 1 A4 page.”

Should be read “VI. Potential of the proposed concept solution and technology to achieve major societal challenges - Avoiding the use of unnecessary technical jargon, describe clearly how the proposed concept solution and technology can contribute to the achievement of major societal challenges such as an expected increase in the number of STEM professionals by 2025 and the reduction of the member states costs with early school leavers. Maximum 1 A4 page.”

The above amendments in nothing changes the objectives of this Invitation to Tender and only amend misspelling mistakes.
