

Get to know the technology of tomorrow!

Among the available e-learning platforms, there are only a few which are really customized towards the needs of the end user, promoting creative learning and innovative teaching.

That is where IMAILE steps in, using the PCP tool: the project develops PLE.s – personalised learning environments. Testing will be completed in November and two different software options are ready to be presented. Meet the IMAILE team at the following events, November 2017 – January 2018, and learn about our **two major findings**:

- 1) PCP as a tool to innovate the Education sector
- 2) Two PLE.s developed for STEM (Science, Technology, Math) based upon customer and end-user needs

**IMAILE at
the BETT show
save the date: 24-27 January 2018**

On **26 January 2018**, IMAILE will hold a side event at the BETT show in London. The BETT show is a large trade show promoting information technology in education.

DATE	LOCATION/VENUE	TARGET AUDIENCE	TOPIC	HEADLINE	Link
09.11.2017	VINNOVA Swedish Innovation Agency Stockholm, Sweden	Procurers and policy makers	Present IMAILE for procurers and policy makers	PCP in the education sector	www.upphandlingsmyndigheten.se/kalender/Vaga-mer-och-na-langre
